PICK+MIX 18V

Leading technology.

With the new LiHD technology, Metabo achieves a new performance level in cordless machines which are directly comparable to that of corded tools. It is the combination of many different components that offer added power, service life, and runtime. No matter what Metabo battery pack you choose.

More power

with new LiHD cell technology in combination with a newly developed battery pack.

- Enlarged power rails and contacts capable of handling high currents
- 3x better conductivity with cell connectors made of a specialized copper alloy

More runtime

- More active material in the cell
- Use of high quality materials (silver and copper)

Longer service life

and extreme ruggedness:

- Optimal protection against internal contamination with fully encapsulated cast design and full protective coating of electronics, as well as optimal gasket in the cover structure.
- Protection of the cells with rubber pads
- Less frequent charging due to more usable cell energy
- Exterior rubber coating on the battery pack provides a secure and non-slip grip and also serves as shock protection

power cut wood

For quick, coarse and medium-fine cuts

steel cut

Universal use for cold cuts in metals
Particularly suited for use in sheet steel, steel profiles and sandwich materials

precision cut wood

For very good, clean cutting results for longitudinal or cross-cuts

fibercement cut

Especially for use in cement and gypsum-bound fibre and chipboards
Very long service life and high cutting quality thanks to PCD teeth

multi cut

Universal use for demanding materials
Perfect cutting results

laminate cut

Perfect cuts in laminate thanks to special tooth geometry
Reduction of vibration and noise thanks to laser ornaments

aluminium cut

Perfect cuts in aluminium thanks to special tooth geometry

cordless cut wood

Maximum runtime for cordless saws thanks to extra-thin cutting width and steel blade thickness
Increased number of cuts per battery pack charge
